

Insurance Claim Assistance

Storm damage and insurance claims can be stressful, but you don't have to navigate the process alone. **HiPoint Roofing & Exteriors** is here to guide you every step of the way—at no additional cost with every restoration project.

1. Insurance Adjuster Inspection

We recommend your **HiPoint** Project Manager be present during the adjuster's inspection to help ensure all storm-related damages are properly identified and documented.

2. Insurance Estimate Review

Once your insurance company provides the Scope of Loss, we review the estimate to help ensure all necessary repairs are included.

3. Supplements & Additional Approvals

If additional repairs, code requirements, or hidden damage are discovered, we work with your insurance company to submit the necessary documentation for approval.

4. Project Planning & Restoration

After approvals are complete, we help you select materials and prepare your project for construction. If unforeseen issues arise during the restoration, we guide you through the next steps and provide the documentation needed for your insurance company.

We're Here to Help

From meeting with your adjuster to handling supplements and final paperwork, **HiPoint Roofing & Exteriors** is committed to making your restoration process as smooth and stress-free as possible.

Insurance claim assistance is included as a complimentary service with every restoration project with **HiPoint.**
